Projects

A Deep Learning Framework for Fish Classification

- In this Project Deep Learning Techniques Like-**CNN**, and **Yolo** Are used.
- In order to classify fishes transfer learning was also used which beats the highest accuracy of **99.889**.

Person Identification and Validation Using Digital Forensic Methods

- The project centers on person recognition through biometric or fingerprint images, employing deep learning techniques such as **Resnet50** and **VGG16**.
- The VGG16 model demonstrated a commendable accuracy of **93.23%**, while the Resnet50 model outperformed with an impressive accuracy of **98.342%**.
- The successful implementation of deep learning models underscores the project's efficacy in achieving high accuracy rates for person recognition.

Achievements

- **our team secured 3rd position over 47 teams in the webathon** conducted in our college annual fest Stepcone.
