OBJECTIVE

Looking for a challenging role in a reputable organization to utilize my technical and management skills for the growth of the organization as well as to enhance my knowledge about new and emerging trends in the IT sector.

PROJECTS

Memory-Matching-Game

- This project is done by using HTML, CSS and JavaScript.
- the agenda of this project is to provide thinking and improve brain power to the maximum extent.

SMS SPAM DETECTION USING DEEP LEARNING

- In this project I have used Convolutional Neural Networks. And models like LSTM and BERT are used.
- The main agenda of this project is used to classify the text whether it is spam or ham
- Accuracy of this model reaches to 99 % which beats the best score.
